PROPERTY SOLUTIONS

DATEX SITE VISITS MODULE

Enable property managers to capture tenant interviews, review maintenance items, and track service requests.

PRODUCT FEATURES

- Runs on mobile tablet devices

- Capture current tenant interview details

- Historical detail is just a click away

- Capture condition of common areas

- Includes site, building condition, and lighting views

- Integrates with Datex Service Requests module:

  a) Initiate and track service requests

  b) Upload images relevant to maintenance

- Integrates with Datex Reporting & Workflow System:

  a) Schedule and track progress of site visits

  b) Automatically notify managers of progress

  c) Integrate site visits in monthly reporting

  d) Seamless MRI and Yardi integration

POWERFUL INSPECTIONS

Visits to shopping centers and other commercial properties become more manageable when you can capture tenant detail, maintenance issues and vendor detail in just a few clicks.

SMARTER DECISIONS

Having access to all of your property data in real time from anywhere increases productivity while yielding better business decisions.

DEEP INTEGRATION

Datex extends and leverages the data you already have and makes all your information accessible within just three clicks.
